

EXPERIENCE

LED-Signs is a leading provider of LED sign technology in Australia. We have been supplying the industrial sector with safety and production signage for over 35 years. Our experience in the industry means that our development, design and manufacturing processes are industry benchmarks.

EXPERTISE

LED-Signs specialises in indoor and outdoor solutions which combine superior design, longevity, and environmental toughness. Our product range includes video super screens, multimedia displays, multi-line & scrolling signs, menu boards, gaming displays and scoreboards.

VERSATILITY

Our versatility means that we can custom design visual display solutions for mining, resource, warehouse and traffic management applications as well as for architects, signage providers, clubs, hotels, cinemas, airports, schools, retail and advertising organisations.

The versatility and high visibility of LED technology means that it is a powerful and effective communication tool.

Our industrial range is designed for longevity and environmental toughness. All signs can be quickly and simply updated to suit site conditions or safety needs.

Our industrial solutions include applications for:

- Safety (OH&S) information
- Production information
- Traffic management
- Warehouse displays
- Mobile trailer applications

Our industrial display options include:

- Static or scrolling signs
- Full colour RGB screen applications
- Safety board packages
- User friendly software interfaces for instant updating

Industrial Solutions

Safety | Production | Traffic

VITAL INFORMATION INSTANTLY

LED signage is bright and legible from greater distances than similar sized static signs making it a powerful and effective way of communicating vital site conditions, safety notices, productions targets and traffic flow messages.

Safety (OH&S) Information

The unparalleled visibility and durability of LED signage means that safety messages and warnings can be clearly seen day or night. Messages can be scheduled or changed instantly to deliver critical safety messages or alert staff to dangers.

Production and Site Information

Keep staff and visitors fully informed about work site conditions. LED signage technology allows the user to display important messages including production targets, company announcements & up- to-date site conditions.

Traffic Management

From parking station management to industrial site and loading dock systems, LED-Signs' traffic management applications assist with traffic flow and can display road conditions, loading directions and safety information.

Warehouse Displays

Our electronic warehouse information systems allow the user to display locations and zones, give warnings and alerts, and reinforce OH&S issues. LED-Signs' industrial displays are available in ultra-bright that are clearly visible in broad daylight and as standard brightness displays which are suitable for indoor locations.

Mobile Trailer Displays

LED-Signs' trailer mounted displays are easy to transport and set up, are solar powered and come with a number of communication options. Our trailers are ideal for traffic management and can be moved to any location depending on need.
