LED SIGNS

Airport Solutions
Accurate | Highly Visible | Durable

EXPERIENCE

LED-Signs is a leading provider of LED sign technology in Australia. We have been supplying Australian and overseas airports with complete airport signage solutions for over 35 years. Our experience in the industry means that our development, design and manufacturing processes are industry benchmarks.

EXPERTISE

LED-Signs specialises in indoor and outdoor solutions which combine superior design, longevity, and environmental toughness. Our product range includes video super screens, multimedia displays, multi-line & scrolling signs, menu boards, gaming displays and scoreboards.

VERSATILITY

Our versatility means that we can custom design visual display solutions for airports, including stand alone solutions as well as fully integrated applications.

LED-Signs offer a complete airport solution which incorporates custom designed applications, high visibility as well as central communication and control systems.

Our airport applications include:
- Flight information displays
- Check in applications
- Gate information
- Baggage collection
- Controllable apron systems
- Parking displays
- Taxi queuing information
- Advertising applications

Our airport applications feature:
- Single, tri and full colour displays
- Screens to display airline logos
- Scrolling information line
- Airport management software interfaces

ACCURATE & TIMELY INFORMATION

Our range of airport systems are low maintenance and economical to run. They are designed to provide accurate and timely information to travellers, airport staff and visitors.

Flight Information Displays

Departure and arrival information displays are an integral part of an airport, providing timely and important information to passengers and visitors alike. LED-Signs' FIDs are easily interfaced with airport management software systems and are available with full colour LCD screens to display airline logos.

Check-in Applications

LED-Signs' range of ticket and check-in counter signs are customised to suit exact requirements. They can be connected to central control systems or controlled locally and can be incorporated into cabinets that display logos and other static information.

Gate Information & Baggage Collection

Travellers expect clear and concise information at departure gates and in baggage collection areas. Our communication options allow messages to be updated quickly and controlled centrally and/or locally depending on need.

Controllable Apron Systems

The unparalleled visibility and durability of LED signage means that tarmac and apron safety messages and warnings can be clearly seen day or night.

Parking and Taxi Queuing information

From parking station management to taxi queuing systems, LED signs assist with traffic and people flow, and provide real time updates regarding waiting time and availability.

Advertising

LED-Signs' advertising solutions include a high quality range of text, graphic and video screens. From large full colour outdoor billboards to indoor scrolling displays, LED-Signs' range of visual display solutions are flexible and easily updated.
