

EXPERIENCE

LED-Signs is a leading provider of digital display technology in Australia. Our 35 years experience means that our multi-panel LCD solutions are the best available. Our high quality, thin bezel screens coupled with our project management experience ensures a total LCD solution.

EXPERTISE

Our expertise means that LED-Signs provides its customers with a total solution. Our project management team will design, install and commission a complete LCD solution to meet the specific needs of our clients. Our multi-panel LCD applications are supported by cutting-edge software and have a unique mounting system that allows for easy servicing and maintenance.

VERSATILITY

Our versatility means that no application is too difficult and we can accommodate all design constraints. Our multi-panel LCD solutions are suitable for advertising, gaming, hotels, clubs, cinemas, airports, schools, building foyers, industrial and retail applications.

LED-Sign's LCD video wall solutions feature high quality, commercial grade, 46" LCD screens that have the world's thinnest large format display bezel, allowing almost seamless video display walls.

Our Multi-panel LCD solutions include:

- Hospitality applications
- Sporting and Stadium applications
- Advertising applications
- Airport applications
- Cinema applications
- Retail applications

Our complete multi-panel LCD package features:

- Samsung 46" commercial grade LCD screens.
- A total bezel width of 6.7mm for virtually seamless video walls.
- 450 or 700 nit brightness options.
- Easy installation allowing almost unlimited configurations.
- User-friendly control software that allows content scheduling & multi displays from multiple sources on the one video wall.
- A mounting system that allows easy servicing and maintenance.

ALMOST SEAMLESS VIDEO DISPLAYS

LED-Signs' multi-panel LCD solutions for the hospitality sector includes content scheduling for advertising, picture in picture modes for live TV, and multiple signal sources for betting and TOTE applications. Our screens have the thinnest bezel providing almost seamless video displays.

Sports Bar Applications

LED Signs' multi-panel LCD displays can be configured to meet any screen size requirement.

Our LCD solutions incorporate the latest technology resulting in a high definition image for both live TV and video displays. Our thin bezel means that projection screens and large plasma displays are no longer the only options for seamless viewing. Our LCD video walls have a far superior image to projection screens and are more competitively priced than plasma.

Entrance Foyer Applications

LCD foyer displays make an impact. They add ambience and functionality to any entrance space by creating a focal point that can be both informative and attractive to look at.

Our LCD screens are available in 450 or 700 nit to suit the ambient light. The clarity and brightness of LED-Signs' LCD range provides an opportunity to display entertainment and advertising content that can be updated instantly using our user friendly software interfaces and/or our scheduling functionality.

Betting (TOTE) Applications

LED-Signs' multi-panel LCD's for betting applications can be configured in any format. From a large multi-panel wall, to a vertical display or a tickertape type display, all applications are easily achievable.

Our first to market LCD software systems allow for multiple signal sources and 3 level in picture, in picture content displays that can accommodate the most creative of requirements.
