

EXPERIENCE

LED-Signs is a leading provider of LED sign technology in Australia. We have been supplying sporting venues for over 35 years. Our experience in the industry means that our development, design and manufacturing processes are industry benchmarks.

EXPERTISE

LED-Signs specialises in indoor and outdoor solutions which combine superior design, longevity, and environmental toughness. Our product range includes video super screens, multimedia displays, multi-line & scrolling signs, and single & multipurpose scoreboards.

VERSATILITY

Our versatility means that we can custom design visual display solutions for advertising organisations, signage providers, sporting venues, casinos, clubs, hotels, cinemas, airports, schools, architects, builders, mining and retail organisations.

LED-Signs' extensive range of stadium solutions are of superior quality, incorporate custom engineered scoring functionality for a variety of sports and have the ability to display advertising and venue promotions.

Our basketball and racecourse solutions are designed to meet the specific needs of these sports.

Our stadium applications include:

- Outdoor scoreboards and video screens
- Perimeter screens
- Indoor stadium scoreboards and screens
- Racecourse applications
- Mobile trailer displays
- Advertising displays
- Ticket box and parking applications

Our sporting applications feature:

- Single and full colour options
- Live video and instant replays
- Custom made, user-friendly software interfaces.

INDOOR & OUTDOOR SOLUTIONS

All our stadium installations are supported by our experienced project management and coordination team for superstructures.

Outdoor Scoreboards and Video Screens

LED-Signs' range of TECNOVISION OLYMPIC displays are designed to have the brightness and resolution required for large scale installations such as Rome's Olympic Stadium and the San Siro Stadium in Milan.

Perimeter Screens

Our perimeter screens are specifically designed to deliver stunning television reproductions and highly visible advertising messages that can circle the entire playing area. Messages can be displayed in various formats including still graphics or as animations.

Indoor Scoreboards and Video Screens

LED-Signs' indoor stadium applications can integrate scoreboard functionality with live video and instant replays, time keeping clocks and other graphic and alphanumerical displays. Our single sport applications include custom scoreboard configurations and specifically designed scoring software.

Racecourse Applications

LED-Signs' stable management system features a series of networked LED signs to display horse, jockey, trainer and race details. The system is supported by touch screen LCD way finders and a database that permits user. Stable allocation is managed via laptop or handheld units.

Mobile Trailer Displays

LED-Signs' trailer mounted displays are easy to transport and set up, are solar powered and come with a number of communication options. Our trailers are ideal for crowd management and can provide additional scoreboard displays.

Ticket Box and Parking Applications

Our range of ticket box and parking displays are legible from greater distances than similar sized static signs, and are supported by management systems that indicate availability, traffic flow, and other important information.
